

ELSEVIER ADVERTISING PRINT SIZES AND SPECIFICATIONS

CONDITIONS

All advertising material is subject to the approval of the publisher, Elsevier, who reserves the right to decline any material. We cannot accept responsibility for print quality if digital specifications are not followed. Costs will be incurred for any amendments or alterations made by Elsevier as a result of incorrect advertisement specifications.

ADVERTISING SIZES

The journal size is **210 x 280 mm**. An allowance of **3–5 mm** on each outside edge in addition to the trim size is required for all full pages and all DPS. Text should not come within **10 mm** of the trim size of the journal.

DPS adverts must be supplied as 2 separate full pages with 5 mm bleed and a 3 mm clearance on the inside gutter margin.

This is a Perfect Bound publication which requires gluing of the inside page margin – please be aware of this when designing your DPS advert.

Software

We advise customers to generate or amend artwork in the following design programs: Adobe InDesign, Adobe Illustrator, Adobe Photoshop or QuarkXpress.

We accept:

- We accept press ready, high resolution PDF files generated from native design programs through 3DAPv2 settings. * If you are generating PDFs through InDesign, Illustrator or Photoshop please flatten any transparent areas within the files before postscripting. For a complete reference and troubleshooting guide on how transparency affects output please refer to Achieving Reliable Print Output from Adobe Applications with Transparency at www.adobe.com/studio/print. There are also other invaluable guides under the headings of Print Resources, PDF & Printing and Colour & Transparency.

We do not accept:

- PDFs generated from MSOffice packages such as Word, Excel, Publisher or Powerpoint.
- Any native files or Quickcut.

Fonts

- We cannot guarantee the best printed results from Photoshop text. We do not accept TrueType or CID fonts. Use Postscript fonts or create an Outline of the fonts in Illustrator. Include all printer and screen fonts.

Colours

- CMYK only for both colour images and illustrations.
- When saving files in the Photoshop EPS format do not include halftone screen, transfer function and do not embed colour profiles.
- It is recommended that all black type be made up using process black only, not four colours.
- The maximum total ink weight of the file in any area should not exceed 310% with a 90% black maximum, should use UCR and allow for a 14–18% dot gain.
- Overprint white text should be set to knockout.
- Knockout black should be set to overprint.

Resolution

- Four-colour CMYK – 300 dpi at final (100%) size.
- Black & White Line Art – 1200 dpi at 100% print size.
- QR code minimum size is 13 x 13 mm and generated using a shortened URL.
- Please ensure that all images are properly cropped and scaled to as near to 100% of the final advertisement size as possible.

Document

- All live copy must be kept within the type area. This includes all text, images, keylines, key numbers and borders.
- Avoid running small type across the gutter. For headings that need to run across the gutter please allow a minimum of 1 mm clearance on both sides of the gutter. Allow 3 mm clearance on both sides of the gutter for Perfect Bound publications.

Delivery of material

- Email to newzealand@aima.net.au
- All material must be supplied on time to allow for checking procedures. Late material is liable to incur additional production costs. Additionally, Elsevier cannot take responsibility for the accurate reproduction of ads if material has been supplied late.
- We accept files via ftp or secure ftp delivery sites e.g. wetransfer.com, dropbox.com etc.

Disclaimer

- Elsevier cannot be held responsible for the reproduction of material that does not adhere to any specifications outlined within this document.
